## ABOUT THE USER MANUAL

This document provides information about the functions available within the mobile app and how to access them.

## ABOUT THE APPLICATION

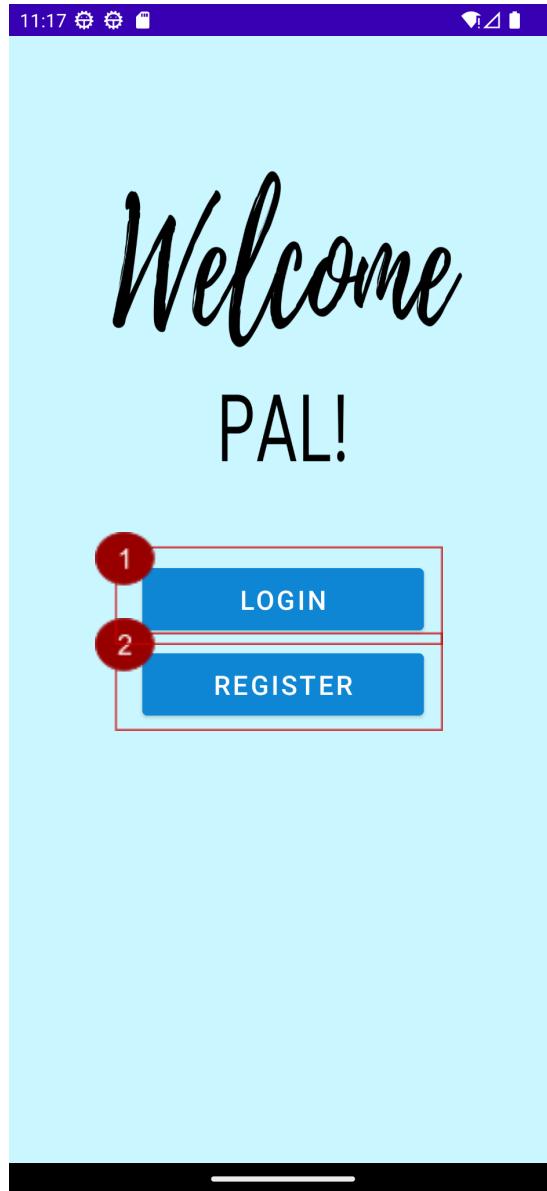

The NU-Rescue app provides a rescue service for stray or abandoned pets and animals. Instead of leaving your dogs on the streets if you were unable to care for them, you could use the tool it provides to surrender them. Additionally, you can adopt animals that are in need of a home using our adoption tool.

## SYSTEM REQUIREMENTS

Requires a smartphone running the Android operating system (OS). Android must be at least version 4.1, and the phone must have 300MB of free storage. An internet connection is necessary to use the mobile app's features.

## DESCRIPTION OF APPLICATION FUNCTIONS

### 1. LOGIN

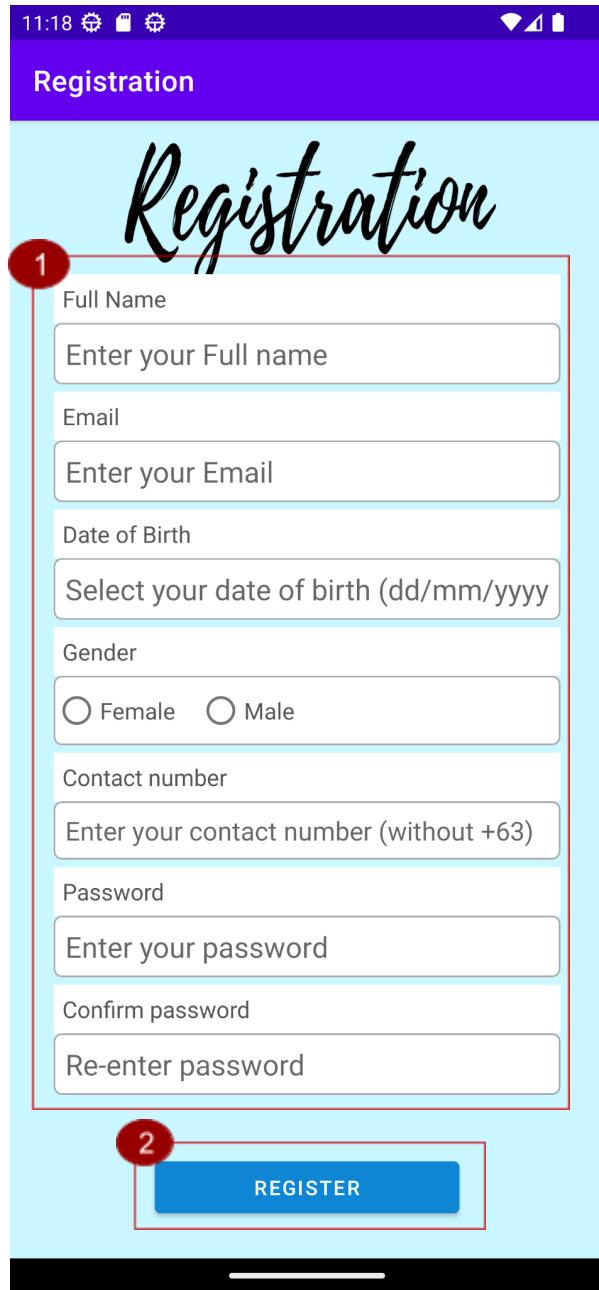

- Allow a few seconds to pass on your Android device, and you will then be directed to the startup page.
  - Startup Page
    - On the startup page, you can choose the type of startup. You wish to create or access as a user.

1) Login Page

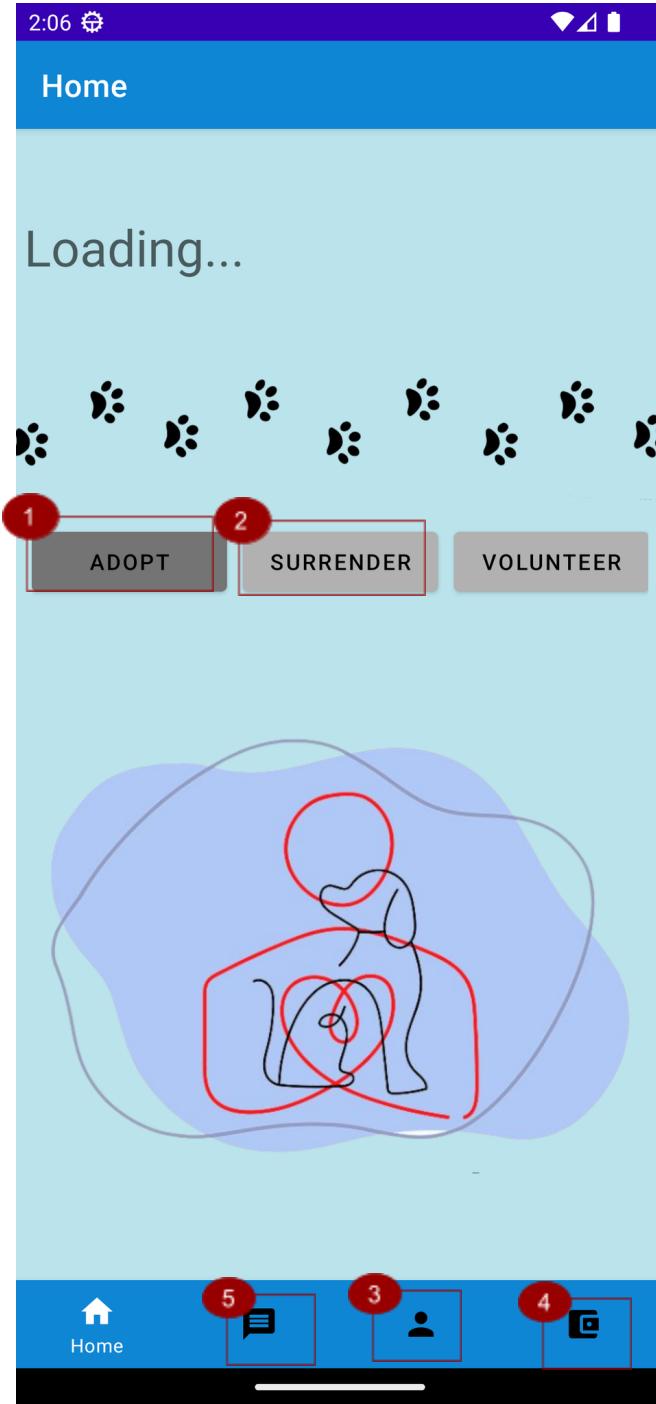

- 1) Enter your email address
- 2) Enter the Password
- 3) Click login
- 4) You can use your Facebook or Gmail to register.
- 5) If you don't have an account, click the register link.

## 2) Registration Page

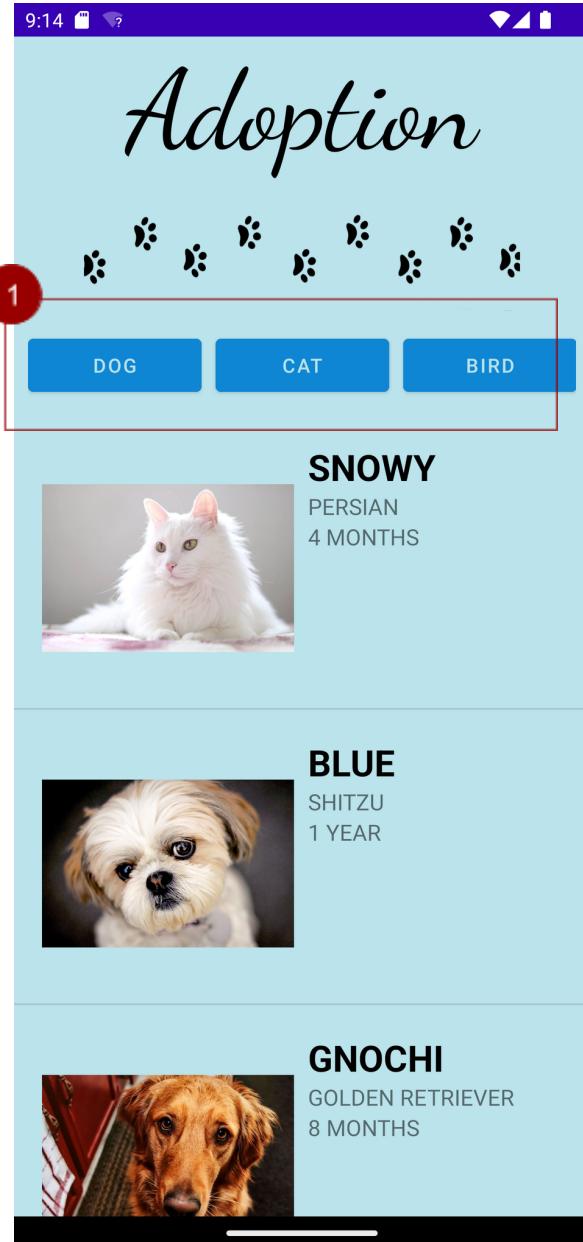

- 1) You must provide your Full name, email address, Date of Birth, Gender, Contact Number, and Password to confirm your desired password.
- 2) You can continue if you already have an account.
- 3) login by selecting "Register" beneath the form.

## 2) Home Page

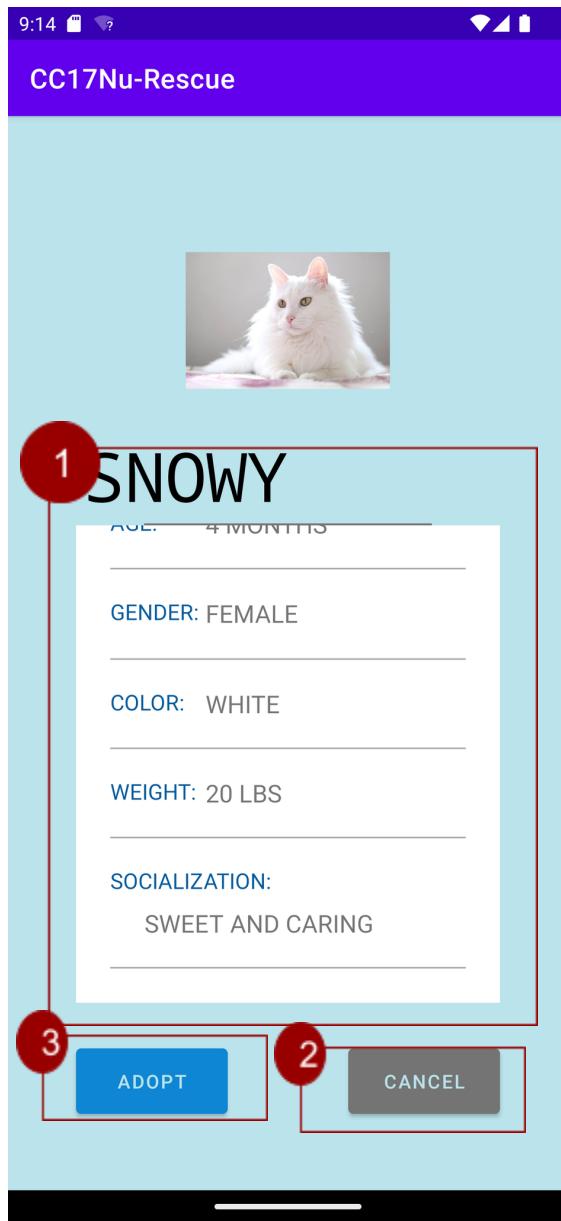

- After logging in as a user, the app will take you to the home page. The home page displays where you can adopt, surrender, and volunteer.
- Beneath it, you can see the profile, message, profile, donations, and location.

- 1) tap the adopt button to adopt
- 2) tap the surrender button to surrender pets
- 3) tap on the profile to view your information
- 4) tap to donate
- 5) tap to send a message

- 1) Adoption Page
- 1) simply select the categories you want to use.

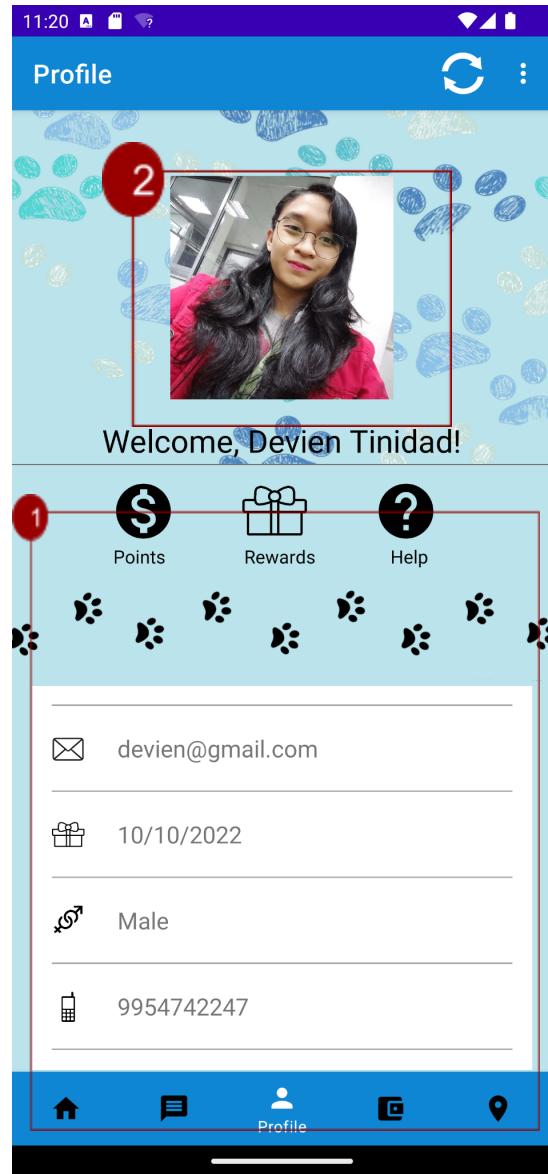

- 1) After selecting the animal you want to adopt, you may view all of its information.
- 2) If you don't want to adopt the pet, you can click the cancel button.
- 3) If you do, a confirmation screen will appear after you click the adopt button.

The screenshot shows a mobile application interface for a pet surrender request. At the top, there is a decorative header with the word "Surrender" in a large, cursive font, flanked by small paw prints. Below this, the title "NU-RESCUE" is displayed in a bold, sans-serif font. The main section is titled "Pet Surrender/Intake Request". A descriptive text block explains that users can rehome their pets by filling out the form and sending photographs. The form consists of several input fields, each with a required asterisk (\*): "Your Name\*", "Your Email\*", "Your Phone\*", "Your Address\*", "Animal's Name\*", "Breed\*", "Color(s)\*", "Age\*", and "Gender\*". There is also a placeholder text "Home#/Home address/City" below the address field. At the bottom of the form, there is a black bar containing a white horizontal line.

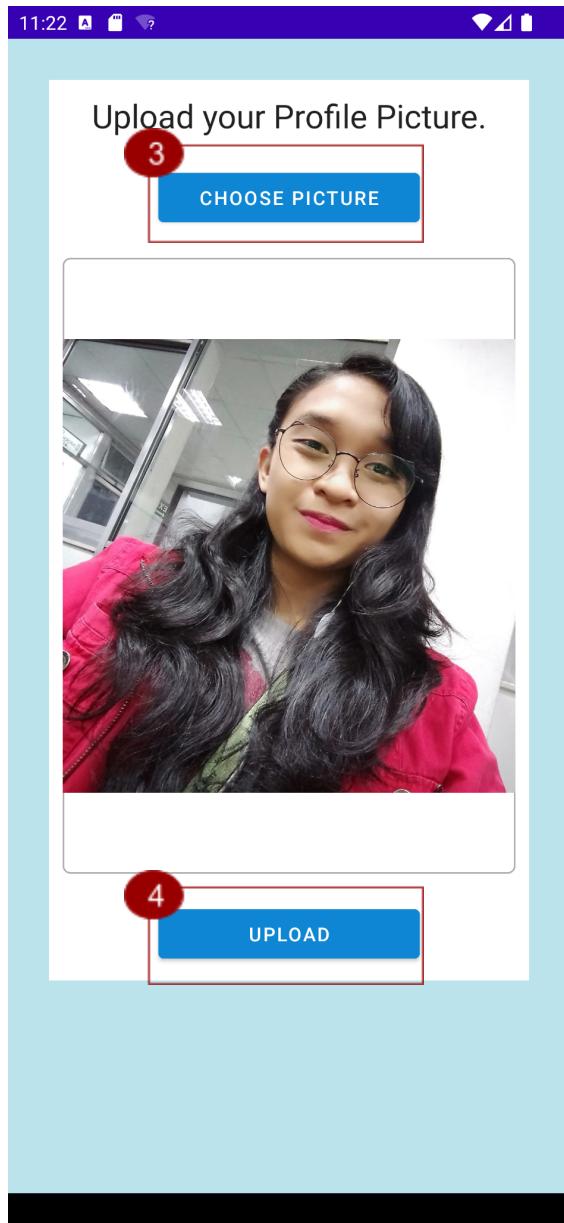

2) Surrender page

- 1) Simply fill out the form and press the surrender button on the surrender tab.
- 2) If you do not want to proceed, click the cancel button.

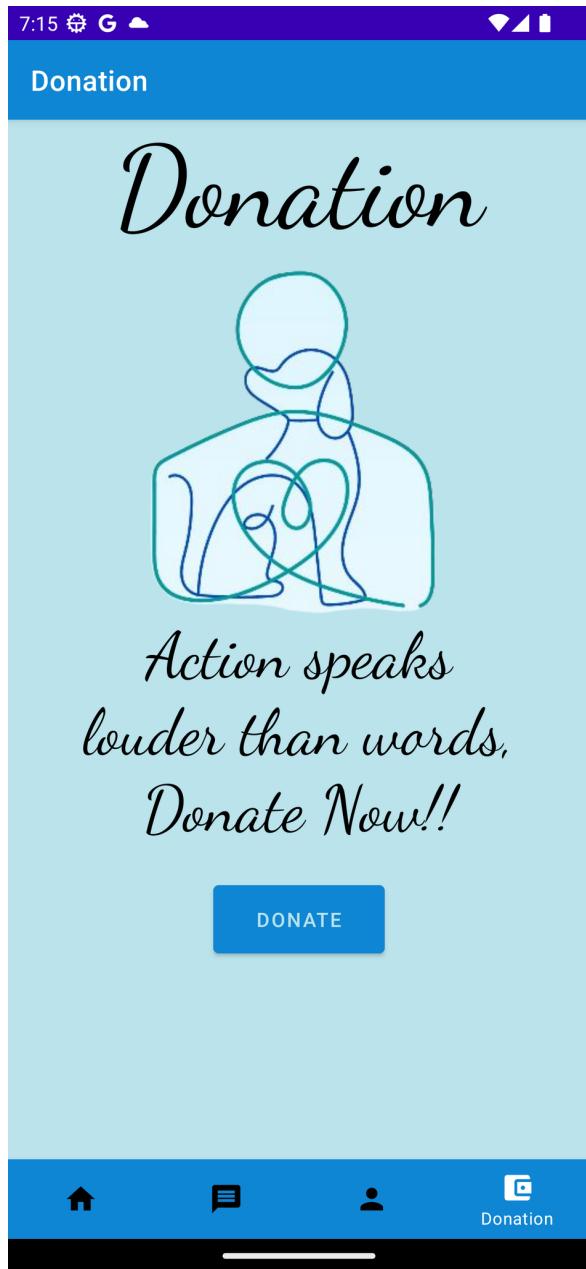

### 3) Profile Page

- 1) This tab contains all of your information.
- 2) Simply tap on the profile and choose the new image if you want to change your profile photo.

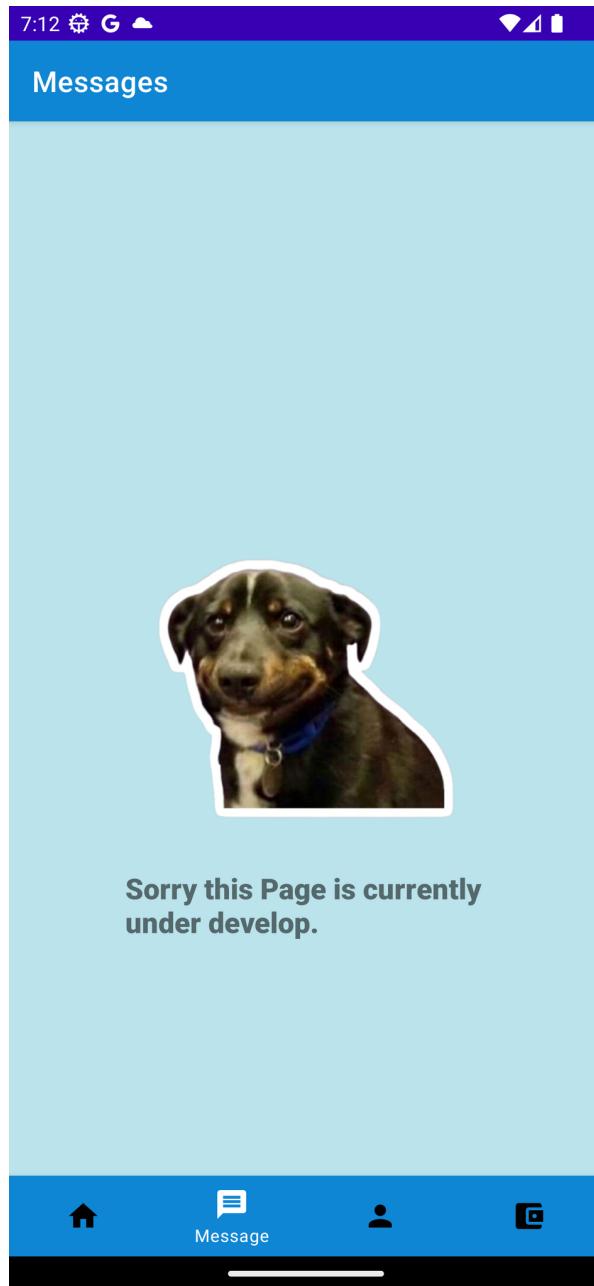

3) choose a new image if you want to change your profile photo.

4) tap upload to set your profile

4)simply click the donation button.

5)The message button is still under development.
